

noir

for vibraphone and woodblocks

GILBERTO AGOSTINHO

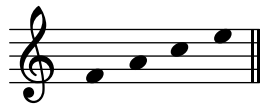

(2013)

General Performance Notes

noir is a piece written for a solo percussionist performing on a vibraphone and four wood blocks of different sizes. The required range of the vibraphone is:

From the lowest to the highest, the four wood blocks are notated as:

The vibraphone's motor should remain off throughout the composition.

When indicated, the pedalling is strict; when not indicated, the player can freely create his own pedalling patterns. For instance, the player can create "chords" by sustaining several different notes together, or he can also raise the pedal at each new note producing only one voice. It must be noted though that all notes, including the longest ones, should last for at least their full duration (therefore the vibraphone part should always be played as legato).

This piece requires four mallets. It is advised that the performer uses one single kind of mallets for the vibraphone (medium mallets are a good choice given the range *pp* to *ff*), and wooden beaters for the woodblocks. A ricochet effect is sometimes employed in the highest woodblock; although notated with four notes, the exact number of bounces is not strictly notated.

Durata: ca. 5'30"
